

## Moodle Template for Fall 2020 Math Department courses

The departmental COVID-19 taskforce has developed a Moodle template that is suitable for most Math courses without discussion sections. It was adapted from the NetMath Moodle template. The template is meant to save time by giving instructors a reasonable starting point that can be modified for each course. Use of the template is optional.

- To simply view the template, email Karen Mortensen ([kmortens@illinois.edu](mailto:kmortens@illinois.edu)).
  
- To get your own copy of the template to adapt for your course:
  1. Request a new course in Moodle ([learn.illinois.edu](http://learn.illinois.edu)), either registrar-linked, for the actual course you are teaching, or a development site.
  2. When you get to **Choose a blank course site or copy contents from another course site**, check "Select preload source."
  3. Then check **Copy from a course site you or a colleague has used before**.
  4. Next, check **show courses from another instructor** and type in Karen Mortensen's netid **kmortens**.
  5. The template you want is called **Fall 2020 Math Dept Template for 300 and 400 level**.
  6. You can contact Karen ([kmortens@illinois.edu](mailto:kmortens@illinois.edu)) with questions.
