College: _____ Curriculum: _____

Course call number: _____ Course number: _____

Course section: _____ Hours: _____

Course to be taken during: fall spring year: _____

Instructor's name: _____ Instructor's approval: _____

College Honors Credit Learning Agreement attached (required): yes no

Undergraduate Advising Office approval: _____

PROPOSAL

Please provide a description of your project. Your choice of projects should make the course qualitatively different; extra homework is not adequate, however additional challenging homework may be acceptable. Time spent should be at least one hour per week above regular demands of the course.

A written project report is a requirement for Honors credit in all Mathematics courses. The report should not exceed ten pages. I agree that I will provide a written project report to the instructor at the conclusion of this course.

No honors credit is given for courses that do not count toward graduation in LAS, such as Math 002, 012 or 016. I understand that I cannot take this course for both a Credit/No Credit grade and for Honors credit, and that if I do not complete the special work described in the proposal above to the satisfaction of the instructor, I will receive regular credit only for the course.
