

Space Committee

The department has a new committee, formed by the Executive Committee (EC). The charge to the committee is:

- To help the department utilize and improve its physical facilities so as to foster the research of current and retired faculty, postdocs and graduate students.
- To propose (and then help implement) policies on office assignment and other space usage that will enable the department to properly accommodate its members in the short term.
- To build the case for more, and better-quality, space for the department, by assessing the department's longer term needs.
